Fax: (865) 305-6823

The University of Tennessee Graduate School of Medicine and the UT Department of Medicine is presenting an upcoming continuing medical education activity, **Eights Annual Stroke Symposium: Stroke: Across the Continuum of Care**. The conference will be held **May 3, 2016** at the **UT Conference Center in Knoxville, Tennessee**.

You are invited to exhibit at this event. Each booth is \$750 (made payable "The University of Tennessee Graduate School of Medicine"), which includes the exhibit booth and one company representative. Each additional representative will be \$50 each.

The exhibit space is staged outside the conference session room. Many companies are being asked to attend. Space is limited. **We are anticipating approximately 70 participants at this year's event.**

Stroke is the fifth leading cause of death and a leading cause of disability in the United States. Although improvements in care have resulted in a decreased rate of death among stroke patients, approximately 795,000 Americans experience a new or recurrent stroke each year. Approximately one quarter of those strokes are recurrent events. On the average, someone dies every four minutes of stroke. Tennessee ranks 47th in stroke related mortality.

Currently in Tennessee, stakeholders and legislators are working to establish guidelines to assist the state's regions in developing efficient, accessible stroke systems of care, which the Eighth Annual Stroke Symposium will address in an effort to reduce the time lapse from onset stroke symptoms to treatment.

As the accredited provider (ACCME), The University of Tennessee appreciates your consideration of this request for exhibit space. For reporting purposes, our federal tax ID number is 62-6001636.

Sincerely,

Denise Blake
CME Coordinator
