Answers	Comments
Other	uninsured patients

Other

I am a nursing educator, not in a practice setting

6. As a participant, how might the format of this activity be modified to ensure future activity satisfaction (select all that apply)?

Answer	Response Count	Percent
Schedule more time for Q and A	6 out of 64	9.38%
Include more case-based presentations	17 out of 64	26.56%
Increase interactivity with attendees	4 out of 64	6.25%
Add breakouts for subtopics	9 out of 64	14.06%
Add a hands-on component	6 out of 64	9.38%
Format appropriate, no changes needed	33 out of 64	51.56%
Other, describe	4 out of 64	6.25%

Total answers: 64

Comments

Answers	Comments
Other	Offer some pediatric-oriented topics
Other	allow participants to write down questions on index cards
Other	schedule Dr. Vora in the morning
Other	The practical teaching education was very helpful

7. Do you plan to change your practice as a result of attending this activity?

Answer	Response Count	Percent
Yes	34	47.22%
No	38	52.78%

Total answers: 72

Comments

Answers	Comments
Yes	Add information for pt regarding BMI, use information regarding CV effects and hypoglycemia, liked many of the topics discussed by the CDE

Yes	Incorporate most current data when working on diabetes related issues.
Yes	Use Saxenda for weight loss.
Yes	Patient education
Yes	(I'm not in primary care) This meeting enabled me to better communicate treatment recommendations to my patients
No	N/A
Yes	Several good updates
Yes	Focus on adding insulin sooner than later and focusing on early dx of renal disease
Yes	Present to our staff at weekly staff meetings. Use practical suggestions for patient care that I learned.
Yes	increased education and engagement of patients in their own plans of care
Yes	I want to try and teach my LPN to do basic education for my diabetic patients
Yes	lower my threshold for the use of SGL2 inhibitors
Yes	improved med management
Yes	more education
Yes	more education to include how diabetes affects the body as a whole
Yes	education on self monitoring
Yes	I am not in practice yet, i am a student but I will be applying what I learned to my practice.
No	does not apply to me
Yes	Look more at GFR, be more open to wt loss drugs
Yes	Would like to use some of the newer medications if can find rx assistance for patients.
Yes	The sessions strengthened my knowledge and understanding of diabetes and appropriate treatment. I will apply my knowledge when counseling my pediatric patients in diabetes self care.
Yes	use of metformin with people who have gfr's between 30-60
Yes	I wrote and submitted for publication in local paper article on bariatric surgery.
Yes	advise patient to exercise 150 minutes of increased intensity.
Yes	Ideas for education

Yes	I will implement some extra teaching.
Yes	more nutrition education
Yes	I plan to better manage insulin dependent diabetes. I am a fairly new FNP that has been hesitant to change insulin doses in the past. I feel I can better teach diabetics now and manage weight more appropriately.
Yes	Look into reimbursement
Yes	more options and more aggressive tx
Yes	more pro-active, aggressive treatment for patients with Type 2 diabetes and pre diabetes
Yes	Apply practice guidelines to my practice and increase patient outcomes
Yes	Be more aware
Yes	Implement more EBP into practice
Yes	Increased knowledge of how to help pts
Yes	Give options to patients to make their own decision

15. Speaker Comments:

Answers

Excellent presentations!

Dr. Yates had a lot of good information but was very boring as a speaker.

Very good selection of speakers

All speakers excellent

Great Speakers who encouraged participant questions/answers

Dr.Amit Vora needed more time. I like how he tied everything together.

The first two were great.

needs to be earlier in the day- i read the handout

16. Which topic(s) presented at this year's conference did you find most helpful to your practice?

Answer	Response Count	Percent
Management of Obesity and Diabetes	34 out of 73	46.58%
Prediabetes	32 out of 73	43.84%
Prevention of CV disease	18 out of 73	24.66%
Teaching Kitchens Resources	15 out of 73	20.55%
Diabetes Education 101	22 out of 73	30.14%
Diabetes and kidney disease	20 out of 73	27.40%
Diabetes Update for the PCP	36 out of 73	49.32%

Total answers: 73

17. Please describe any clinical situations that you find difficult to manage or resolve or other topics that you would like to see addressed in future educational activities:

Answers

ICD 10 coding for diabetesw reimbursement

other medical conditions whose treatments are influenced by diabetes

N/A

LADA

Diabetes often present with multiple other diseases. Because of the polypharmacy needed, there are times it is difficult to prioritize which costly medicines I should encourage the patient to take.

Diabetes ketoacidosis

In pediatric patients you must address the patient and the parents. More focus on T1DM.

type of exercises recommended-examples of vigorous exercises?HIT?

Streamlining the visit to fit everything in.

adjusting insulin

figuring out what medication to use when- too many choices!

specifics on classes of diabetic medications

18. Comments about improving this activity and/or location:

Answers

Location is great. I love the fact it is scheduled on a Saturday. Cost per CEU is appropriate. Would like to see all lecture format like this year instead of the roundtable discussion from last year. Would like to hear more topics on nutrition and diabetes.

Very nice facility

None

I wish you would have given me the option to NOT have my home address printed in the list of participants. I like the seating set-up better this year than last year.

None--great location

Avoid overlap of material by each of the speakers. Seemed to be some repetition of screening, comorbidities, diagnosis, etc.

my first time at that location. It was nice and well organized.

None. Nice facility. Good conference.

Great location. Great food

19. Are you a member of the American Academy of Family Physicians (AAFP)?

Answer	Response Count	Percent
Yes	8	10.81%

No	66	89.19%
