

## ACGME Resident and Faculty Surveys

---

The ACGME requires residents, fellows and faculty in the accredited programs to complete an annual online survey on the ACGME website. Per this policy, all residents, fellows and faculty are required to complete the survey, resulting in 100% participation by each ACGME-accredited program. Residents and fellows needing to complete the survey who are scheduled for vacation at the time of the survey window deadline, must complete the survey before they take vacation leave.

The results of each program's survey will be reviewed at GMDEC and be an integral part of a program's Annual Program Review. Program directors will review the results of the survey with their trainees. The DIO will review the survey results with the GME Executive Leadership Board (aka "Governing Body").

The DIO and the GME Office will review the results of annual surveys. Survey items with results that fall below national specialty compliance maybe identified as underperforming based on established criteria, which could result in the need for a Special Review of the program.

Effective December 2008
