### **ACGME RESIDENT SURVEY**

The ACGME requires residents and fellows to complete an online survey. This survey contains questions about their clinical and educational experience and duty hours. All residents are required to complete the survey. The ACGME expects **at least 70% participation**. If there is less than 70% participation, the ACGME will resurvey the program next year. Programs with four or more trainees will be able to print the survey results from the ACGME website.

The results of this survey will be an integral part of the site visitor's review. The GMDEC Internal Review protocol includes a review of the survey results.

Consistent with the ACGME Institutional Requirement that the Institution maintains oversight of its programs (I.B.3-4), the DIO, Director of Medical and Dental Education, and GMDEC will review the results of annual surveys.

Program directors will review the results of their survey with their trainees.

The GMDEC will review each program's survey results with the Program Director. Program directors must prepare a written corrective action plan to GMDEC on survey questions showing noncompliance (% response in shaded area >20%). Customarily this response is expected within 90 days following the GMDEC review. The Director of Medical and Dental Education will follow up with the Program Director for a written response.
