The Internal Medicine Center

Internal Medicine Center:

Our office is staffed with 10 Board Certified Internists and 36 resident physicians dedicated to serving the primary care needs of the East TN community. A resident physician under the supervision and guidance of an attending physician sees patients. Our staff proudly endorses being a part of a large teaching academic center and we firmly believe in our mission of healing, education, and discovery. As part of that mission, patients are encouraged to actively participate in their health care decisions.

Message from the Clinical Director:

Our goal in the Internal Medicine Center is to provide comprehensive medical care through a team approach. Your resident physician will manage your care under the guidance and supervision of an experienced attending physician. We consider our patients an important part of the healthcare team and invite them to participate in their healthcare decision-making.

- Juli Williams MD
